

# CERTIFIED STABLE HYBRID PRODUCT OWNER

Abstract: Planned-based (Waterfall) and Agile project approaches have co-existed for over two decades. A creative new approach to executing projects combines the best aspects of each approach into a “Hybrid Project.” The Stable Hybrid Product Owner is now able to execute dependency-heavy projects in an Agile Sprint-like manner.

As for formality, this experience will include:

A complete 2 day online or classroom session eligible for 16 PDU's and 16 SEU's

A two year membership to the Stable Institute

Eligibility to take the online test and online testing fees are all included as part of this session

A complete guide/workbook with extensive reference materials and exercises

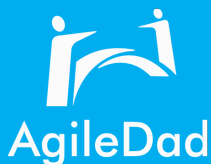

Audience: Individuals familiar with plan-based traditional project approaches (PMP®) and Agile approaches (Scrum) and want to know how to combine them.

Duration: Two Days.

Class Size: The maximum number of students for this workshop is twenty-five.

*This class is available as a PUBLIC course or a PRIVATE workshop for your organization.*

- ❖ Understand how to create a Work Breakdown Structure.
- ❖ Understand how to create a Gantt Chart.
- ❖ Understand how to create a Sprint Board.
- ❖ Understand how to integrate all of these tools.
- ❖ Understand how to use a WBS, Gantt Chart, and Burn-up Chart for project performance tracking, forecasting, & reporting.
