

CERTIFIED STABLE SCRUM MASTER

Abstract: Scrum Master training covers the basics of Scrum and is appropriate for everyone involved in an Agile environment performing Scrum. The Scrum Master is the person responsible for ensuring Scrum is practiced correctly within the environment. A Stable Scrum Master is responsible for ensuring Scrum is practiced correctly, but with Stable Framework techniques added to ensure sustained continual improvement towards Operational Excellence.

As for formality, this experience will include:

A complete 2 day online or classroom session eligible for 16 PDU's and 16 SEU's

A two year membership to the Stable Institute

Eligibility to take the online test and online testing fees are all included as part of this session

A complete guide/workbook with extensive reference materials and exercises

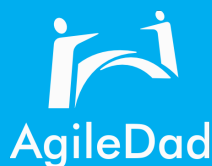

Audience: Individuals and teams wanting to learn Scrum and incorporate the Operational Excellence components Stable adds to Scrum. A CSA is recommended but not required as a prerequisite for the CSSM.

Duration: Two Days.

Class Size: The maximum number of students for this workshop is twenty-five.

This class is available as a PUBLIC course or a PRIVATE workshop for your organization.

- ❖ **Identify and understand the two components of Operational Excellence: Effectiveness & Efficiency.**
- ❖ **Understand the unwanted Hidden Factory, what contributes to it, and how to quantify it within an environment.**
- ❖ **Understand how to perform a Sprint, including the common Sprint meetings.**
- ❖ **Understand how to adjust a Sprint to include support for the Stable Framework.**
- ❖ **Understand how to perform Scrumban, which is an Agile Kanban-based production support ticket-fulfillment process.**
- ❖ **Understand how to use a Burn-up and Burn-down chart to measure Sprint and Project Progress.**
